

## PRODUCT DATA SHEET

### BRAX CALCIUM GREASE MP2

---

#### Description

**BRAX CALCIUM GREASE MP2** is a quality, smooth, calcium-based soap and is fortified with the best known natural solid lubricant graphite. Manufactured to NLGI 2 consistency; It provides the best combination of performance and economy for most application.

**BRAX CALCIUM GREASE MP2** is resistant to water and have good mechanical stability. The use of this grease will minimize wear through the use of the solid lubricants and provide extended lubricant coverage due to even distribution of the product along the wearing parts.

#### Benefits:

- Protection against rust and corrosion
- Excellent water tolerance
- Possesses excellent shear stability under heavy duty service

#### Application:

Recommended for flexible couplings in various industrial where incidental water contact is high.

#### Typical Properties:

Characteristics	Calcium MP2
NLGI Consistency class	2
Appearance	Smooth & Homogenous
Color	Yellow
Type of Soap	Calcium
Work Penetration @ 25 <sup>o</sup> C	265 - 295
Drop Point, <sup>o</sup> C Min	90 - 100
Copper Strip Corriasion	Pass
